

ROMAN PENN Game 1 (Film 11-25-21 vs. Belmont)

He went 5-11 from the field, grabbing 5 rebounds and dishing out 5 assists. He did a good job controlling the pace, operating primarily in the PnR, where he came off the picks aggressively, finding open teammates while taking and making timely shots. His ability to draw multiple defenders in the lane is what I credit with his ability to create shot opportunities for his team.

Defensively, he did a good job of containing the ball on the perimeter for most of the game but did struggle when they let their bigger guards operate as the primary ball-handler. He struggled to affect them as there was a considerable size advantage.
