

Carlton Carrington vs Clemson

2/27/24

Film: ACCN

Offensive Skills:

Carlton Carrington exhibited the ability to hit the three off PNR situations. A play that stood out to me was that he comes off the PNR going L, crossovers, between the legs, steps back and hits the three. In another play, he gets the ball at the top of the key, comes off the PNR going R and makes the three. In addition, Carlton showed the ability to hit a mid-range jumper. Coming off the PNR, going R, crossing L, and hitting a midrange jumper in one play.

Defensive Skills:

Carrington displayed ability as an on ball defender. He moves his feet well, beating his opponent to the spot. He rebounds well for his size, grabbing 4 of his 6 defense rebounds. He did some things wrong on defense like jumping on the shot fake on the wing and getting beat backdoor denying the pass on the L wing.

Conclusion:

Carlton Carrington's ability to hit the three off PNR situations and his proficiency in the mid range jumper. Carrington's on-ball defense and his rebounding abilities. Improving his defensive fundamentals, such as recognizing shot fakes and being more aware of backdoor cuts.
